

Seven Day Challenge Report Card

A natural disaster occurred a number of days ago. Power has been restored, but you still don't have access to your sewage systems. You don't know how long you will be without water so you do not want to waste your supply by flushing it down the toilet ... AND it's about time you shower. You can't put it off any longer.

Today's Goal: Learn about and use proper sanitation practices in a crisis

Daily Evaluation Questions (Things to Ask Yourself)

- What is your plan for dealing with emergency sanitation? (flush with stored water, use a bucket sanitation kit, dig a latrine in your backyard)
- How was your experience using your alternate sanitation methods? What did your family members think of it?
- What could you do to improve your sanitation kit/plan?
- What ideas do you have to make showering/bathing easier, use less water, etc.?
- What did you learn from the evaluation of your first aid items?
