

Seven Day Challenge Report Card

DAY 3:

NATURAL DISASTER

tornado strikes

A TORNADO is tearing through your town. You have been told to evacuate to the nearest shelter and don't know if your house will be there when you get back. Grab what you can and evacuate (after evacuating, you will come back home and will simulate being in a shelter for the rest of the day). To make matters worse the tornado knocked out the electrical grid for your whole town so there is no power at the shelter or your home.

Today's Goal: Evacuate first then survive the day under "shelter conditions"

Daily Evaluation Questions (Things to Ask Yourself)

- Were you able to evacuate in 30 minutes? Did you already have a 72 hour kit?
- Did you have enough food and fuel and a way to cook it? What about snacks?
- Did you have necessary dishes for meals? Plus water and to wash them if necessary?
- Were you and your kids entertained in your "shelter"? Was it difficult?
- Do you have appropriate sleeping gear for a shelter or bug out situation?
- Were you able to survive without electricity for the whole day? What could you add to your preps to make that easier?
