

## **Gourmet Emergency Grab and Go Food Kits**

### **56 Serving Breakfast and Entrée Grab and Go Food Kit**

- Description: 2 servings per day for 1 adult for 4 weeks/4 adults 1 week

Product within this Bucket is:

- Chicken Ala King (4)
- Stroganoff (4)
- Cheesy Lasagna (4)
- Creamy Chicken Pasta(4)
- Cheesy Macaroni (4)
- Chicken Teriyaki (4)
- Southwest Bean and Rice(4)
- Oatmeal (12)
- Granola (8)
- Multi-Grain Cereal (8)

### **60 Serving Entrée Only Grab and Go Food Kit**

- Description: 2 servings per day (entrees only) for 1 adult 1 month/4 adults 1 week

Product within this bucket is:

- Stroganoff (8)
- Creamy Chicken Pasta (8)
- Cheesy Macaroni (8)
- Chicken Ala King (8)
- Chicken Teriyaki (8)
- Southwest Bean and Rice (8)
- Beef Teriyaki and Rice (8)
- Cheesy Lasagna (4)

### **84 Serving Breakfast and Entrée Grab and Go Food Kit**

- Description: 3 servings per day for 1 adult for 4 weeks/4 adults 1 week

Product within this Bucket is:

- Chicken Ala King (8)
- Stroganoff (8)
- Cheesy Lasagna (8)
- Creamy Chicken Pasta(8)
- Cheesy Macaroni (8)
- Chicken Teriyaki (8)
- Southwest Bean and Rice(8)
- Oatmeal (12)
- Granola (8)
- Multi-Grain Cereal (8)

### **120 Serving Entrée Only Grab and Go Food Kit**

- Description: 120 Servings entrée assortment. No Breakfast.

Product within the Bucket is:

- Stroganoff (12)
- Cheesy Lasagna (12)
- Creamy Chicken Pasta (12)
- Cheesy Macaroni (12)
- Chicken Ala King (12)
- Chicken Teriyaki and Rice (12)
- Creamy Tomato Basil Soup (12)
- Southwest Bean and Rice (12)
- Beef Teriyaki and Rice (12)
- Creamy Potato Soup (12)

### **120 Serving Breakfast Only Grab and Go Food Kit:**

- Description: 120 Servings breakfast assortment. No entrees.

Product within the Bucket is:

- Oatmeal (40)
- Honey Glazed Granola (40)
- Multi-Grain Cereal (40)

### **Long Term Food Supply**

#### **240 serving package**

Description: 2 servings of food per day for 4 adults or 2 adults and 4 children for 1 month.

- Number of 120 serving buckets: 2 (see chart below for full list of contents)

#### **360 serving package**

- Description: 3 servings of food per day for 4 adults or 2 adults and 4 children for 1 month.
- Number of 120 serving buckets: 3 (see chart below for full list of contents)

#### **720 serving package**

- Description: 2 servings of food per day for 4 adults or 2 adults and 4 children for 3 months.
- Number of 120 serving buckets: 6 (see chart below for full list of contents)

#### **1080 serving package**

- Description: 3 servings of food per day for 4 adults or 2 adults and 4 children for 3 months
- Number of 120 serving buckets: 9 (see chart below for full list of contents)

#### **1440 serving package**

- Description: 2 servings of food per day for 4 adults or 2 adults and 4 children for 6 months
- Number of 120 serving buckets: 12 (see chart below for full list of contents)

#### **2160 serving package**

- Description: 3 servings of food per day for 4 adults or 2 adults and 4 children for 6 months
- Number of 120 serving buckets: 18 (see chart below for full list of contents)

#### **2880 serving package**

- Description: 2 servings of food per day for 4 adults or 2 adults and 4 children for 12 months
- Number of 120 serving buckets: 24 (see chart below for full list of contents)

#### **4320 serving package**

- Description: 3 servings of food per day for 4 adults or 2 adults and 4 children for 12 months
- Number of 120 serving buckets: 36 (see chart below for full list of contents)

## MORE INFORMATION:

### Food Supply Packages

Wise Foods simplifies the process of choosing the food storage package that best fits your needs. Standard meal packages provide your family with **4 adult servings** of one of our tasty breakfasts or entrees, which also translates into servings for a family of **2 adults and 4 kids** or **3 adults and 2 kids**.

\*\*\* All Entrees are Quick Cook 12 minutes or less.

\*\*\*Buckets = Wise Foods takes the safe-keeping of your food a step further by adding another layer of security placing our 4-serving pouches into compact, 4-gallon, square buckets that are very easy to stack and store.

**Smart Packaging:** Our unique packaging adds value to our meals by protecting them better and making them easier to store and easier to prepare.

- 1. Nitrogen-Flushed Pouch:** Wise Foods' ready-made meals are packed in airtight NITROGEN PACKED pouches. Our unique packaging process removes the majority of the residual oxygen and immediately flushes the mylar bag with nitrogen. This in turn simplifies the preparation process by not having to first locate and then remove an oxygen absorber from each individual pouch.
- 2. Mylar Family-size 4-serving Foil Pouch:** Our unique packaging also adds incredible value to our products by making it easier to store, eat, and further prolong the shelf life of each individual meal. Instead of using #10 cans—which when opened force you to eat enormous amounts of that particular food all at once to prevent rapid spoilage—we package each meal in its own separate mylar pouch, thus eliminating waste. It's basically a flexible tin can that gives you the ability to eat what you want, when you want.
- 3. Square Plastic Container and Grab—and—Go Handle:** We take the safe-keeping of your food a step further by adding another layer of security placing these 4-serving pouches into compact, 4-gallon, square buckets that are very easy to stack and store. Because we don't waste space by using and boxing #10 cans Wise food storage is much more compact and takes significantly less space. Also, because the buckets are small and light, even children are able to grab and carry a month's supply of food, if needed. If you are placed in an emergency situation these buckets can also serve several other purposes, such as digging or disposing of waste.
- 4. Stackable Design:** Each container is notched on the bottom to ensure stackability. In no more space than a washer and dryer takes up, you can store enough ready-made meals to feed a family of 6 for a full year.
- 5. Re-sealable Pull Tab Lid:** Have you ever tried to open the lid of a 5-gallon bucket typically used for food storage? As you know it can be a real pain. Wise's unique bucket contains an easy-to-open, easy-to-close re-sealable pull tab lid.

## **Freeze-Dry and Dehydration Processes**

At Wise Foods, we take a unique and innovative approach to long-term food storage and emergency preparedness. Our ready-made entrees include both freeze-dried and dehydrated components, depending upon the food component.

Through extensive evaluation, research and testing, we have combined both freeze-dried and dehydrated products together to ensure optimal taste, texture and nutritional value. Expensive ingredients such as peas and other vegetables are generally freeze-dried. Other ingredients like noodles and onions actually taste better when dehydrated.

Freeze-Dried and Dehydrated Advantages:

- Food maintains its original flavor, shape, color, and texture
- Food retains its nutritional value
- Food is condensed in size
- With nearly all its water extracted, food is extremely light weight
- With addition of water, food is quickly and completely reconstituted
- Wise customers enjoy peace of mind because of the food's long shelf life

### The Freeze-Dry Process

In freeze-drying, the product is first flash frozen and then placed in a vacuum drying chamber. This process removes 98% of the water and moisture without affecting the taste, color, form or nutritional value of the food item.

### The Dehydration Process

In dehydration, food product moves through a drying chamber where air removes the moisture from the food. This occurs at low temperatures so that the nutritional profile stays intact.

## **Up to a 25-Year Shelf Life**

Wise Foods' ready-made meals are packed in airtight NITROGEN PACKED pouches, and then encased in durable plastic containers. Our unique packaging process removes up to 98% of the residual oxygen through a vacuum oxygen removal and nitrogen flushing practice. Wise Company ready-made meals carry a shelf life of 25 years, with no rotation needed. That's 25 years without the stress of wondering if your family will have enough good, useable food when emergency strikes. Because our entrees won't need to be rotated every few years like other food storage products, buying Wise Foods will save you thousands of dollars long-term as the cost of food keeps going up. By investing in Wise meals you will again be saving thousands of dollars over the years. In an emergency, food may be worth more than diamonds or gold.

## **Great Taste:**

Wise's variety of entrees and breakfasts are not only hearty and nutritious, but also so, so delicious! We've contracted with professional chefs to come up with menu items that both adults and children will love. Each meal is made up of both freeze-dried and or dehydrated components and carefully sealed in its 4-serving mylar pouch. You can be sure that when it's re-hydrated and heated, it will have the same enticing taste and aroma as the day it was first prepared. . .

Freeze-Dried and Dehydrated Advantages:

- Food maintains its original flavor, shape, color, and texture
- Food retains its nutritional value
- Food is condensed in size
- With nearly all its water extracted, food is extremely light weight
- With addition of water, food is quickly and completely reconstituted
- Wise customers enjoy peace of mind because of the food's long shelf life

Because our meals have a 25-year shelf life and won't need to be rotated every few years like other food storage products, they will save you thousands of dollars long-term. By investing in Wise meals, through the years will again save thousands of dollars. In an emergency, food may be worth more than diamonds or gold.

## **Minimal Storage Area**

Typical food storage can take an incredible amount of space to store that most families don't have. Other food storage companies will want you to purchase a year's supply comprising as many as 85 large cases full of awkward and bulky #10 cans. With Wise Company, in no more space than is taken up by a washer and dryer, you can store enough freeze-dried meals to feed a family of 6 for a full year.

## **FAQ**

**Where should I store my Wise Foods?** This depends upon where you live. Meals made up of both freeze-dried and dehydrated components are affected by temperature, moisture and light. Optimal storage conditions for our meals are in cool, dry places.

**How much water will I need?** On average, each individual serving requires 1 cup of water.

**Do I have to use boiling water?** Hot water speeds up the process of reconstitution. Wise meals will be ready to eat more quickly when hot water is used. However, many of the meals can be re-hydrated and ready to eat with any temperature of water.

**How are the meals packaged?** 100% of our meals are packaged in mylar pouches that each hold 4 adult servings. These pouches are then arranged in durable polyethylene buckets for easy storage. Please see our Smart Packaging link.

**How long do the meals last in storage?** Up to 25 years. For optimal storage life it is suggested that food be stored in a cool, dry place, such as a basement.

**How much food should we have stored for our family?** The needs of each family are different. Please refer to our "Storage Calculator" link to best determine your precise needs.

**Why should I purchase from Wise?** At Wise Foods we have a long track record of complete customer satisfaction. We are confident that you will find our product both the best priced and the most available. Most buyers receive their product in less than two weeks from the time it is ordered.

**What alternative uses are there for your product?** In addition to storing Wise meals for an emergency situation a number of customers have found our product to be versatile enough to be consumed on a day-to-day basis. Entrees are also often used on camping, hunting and backpacking trips. Others pull them from the pantry at home or take them to work when they don't have time to prepare a meal or go out for lunch.

#### **Wise Foods Testimonials:**

"Ordering from Wise Foods was seamless and easy. . . I placed my order over the phone four days before Christmas and it showed up on my door step on Christmas Eve just in time and ahead of expected delivery –Thanks!"

-Jay Condie, Chapel Hill NC

"I originally purchased Wise Food Storage with the purpose of being better prepared in case of emergency. But because the meals taste so good and are packaged in individual pouches we found ourselves using the meals not only for emergency preparedness but also every day use."

-Heidilyn Thrapp, Hyrum UT

"From the very beginning I have been impressed with Wise Foods. Besides the meals tasting great and the customer service being exceptional, I was most impressed with the meal packaging. I really like the fact that the meals are individually packaged in mylar pouches and then stored in sealed buckets. This provides greater accessibility and portability for my emergency food storage."

-Kaye Firth, Tremonton UT

"My experience with Wise Company has been an incredible one. As a new salesman for the company, I was approached a couple of months ago by the owner, asking if I'd be willing to take the Wise Challenge. This consisted of living off of a single 84-serving bucket for an entire month with only water to drink. At first I was hesitant to commit, but then I thought that if my job was to help other families be prepared, I needed to know from experience that Wise Company was the right choice.

At the start of this challenge, I noticed the meals were super easy to prepare, and it only took a matter of minutes. Just boil some water, pour in the food, stir, cool and eat. I became a great cook! I will have to say, the meals taste great!

The serving sizes were generous and filling.... I've never been a big breakfast eater, but after this challenge, I love my Honey Glazed Granola! The pancakes can also double as muffins, a great afternoon snack!

The most important thing I learned from accepting this challenge is that, if I and my family were to be involved in an emergency situation, I know we would be okay with our Wise Company Food Storage. The peace of mind knowing we are prepared is worth all of the budgeting, planning and sacrifice it took to make our food storage useable and complete.”

-Joe Rieck, St. George UT

“We went four days straight eating nothing but Wise Food, and our kids loved it; they didn’t get tired of it . . . In fact, while eating the cheesy lasagna, one of my twin five-year-old boys turned to me and said, ‘Dad, this is the best noodles you ever made! . . . My wife and I are kind of picky eaters, and we really liked the meals. They didn’t have the aftertaste of other freeze-dried food we’ve tried. We were pretty pumped about that!”

-Stefan Mamual, Evanston, WY

“We just moved to Manhattan for two years while my husband goes to graduate school, and one thing I insisted on bringing with us was a three-month supply of Wise Food, which I’m stashing in different spots around the apartment. With a three-year-old and one on the way, it’s comforting to know it’s there in case of emergency.”

-Heidi Foss, New York, NY

“Our past food storage experience has been a process of storing and wasting. No matter how hard we tried to rotate and use our storage, we always ended up with cans of expired food. With Wise Food Storage, we are done . . . and we don’t have to worry for the next 25 years”.

-Chris Shill, Layton UT
